**1. Nature of Operations**

The Company was incorporated on August 24, 1984 in the Province of British Columbia. The principal business of the Company is the exploration and development of natural resource properties. The Company has interests in the Extra High Property located in British Columbia and Lithium mineral properties located in Ontario.

The Company also has an investment in software for online gaming and an investment in the securities of a publicly listed related company. The Company's revenues are derived from its investment in the online gaming software.

As of January 17, 2005, Lucky 1 Enterprises Inc. changed its name to Bronx Ventures Inc., its capital stock has been consolidated on the basis of 35 (old) common shares for 1 (new) common share and its authorized capital stock has been increased to an unlimited number of common and preferred shares without par value.

---

**2. Going concern**

These financial statements have been prepared on the basis of accounting principles applicable to a "going-concern", which assumes that the Company will continue in operation for the foreseeable future and will be able to realize its assets and discharge its liabilities in the normal course of operations.

The Company has incurred significant operating losses to date and has periodically had a working capital deficiency. Management's efforts are directed at pursuing opportunities of merit for the Company. It is the Company's intention to pursue equity and debt financings in order to conduct its operations without interruption.

These financial statements do not reflect adjustments that would be necessary if the "going-concern" assumptions were not appropriate because management believes that the actions already taken or planned will mitigate the adverse conditions.

If the "going-concern" assumptions were not appropriate for these financial statements, then adjustments would be necessary in the carrying values of assets and liabilities, the reported revenues and expenses, and the balance sheet classifications used.

**3. Significant accounting policies**

**(a) Basis of presentation**

Comparative operation's figures for the periods ended March 31, 2005 and 2004 include the operations of Bronx Ventures Inc. All amounts are stated in Canadian dollars.

All share and per share amounts included in the accompanying financial statements have been restated to give retroactive effect to the 35:1 reverse stock split described in note 1.

---

**3. Significant accounting policies (continued)**

**(b) Use of estimates**

The preparation of financial statements in conformity with Canadian generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosures of contingent assets and liabilities at the date of the financial statements, and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates and would impact future results of operations and cash flows.

**(c) Mineral properties**

The Company is engaged in the acquisition, exploration and development of mineral properties. The mineral properties are recorded at cost. The costs relating to a property abandoned are written off when the decision to abandon is made.

**(d) Loss per share**

Loss per share is calculated using the weighted average number of shares outstanding.

**(e) Foreign currency translation**

Amounts recorded in foreign currency are translated into Canadian dollars as follows:

- (i) Monetary assets and liabilities at the rate of exchange in effect as at the balance sheet date;
- (ii) Non-monetary assets and liabilities at the exchange rates prevailing at the time of the acquisition of the assets or assumption of the liabilities; and
- (iii) Revenues and expenses (excluding amortization, which is translated at the same rate as the related asset) at the average rate of exchange for the year.

Gains and losses arising from this translation of foreign currency are included in the determination of net loss for the year.

**(f) Marketable securities**

Marketable securities are valued at the lower of cost and market at the balance sheet date.

**3. Summary of significant accounting policies (continued)**

**(g) Amortization**

Property and equipment are recorded at cost. The Company amortizes its assets on a declining-balance basis as follows:

Furniture and equipment	- 20%
Computer equipment	- 30%

**(h) Stock-based compensation plans**

Effective January 2004, the Company adopted the new requirements of the Canadian Institute of Chartered Accountants (“CICA”) Handbook Section 3870, which requires an expense to be recognized in the financial statements for all forms of employee stock-based compensation, including stock options. Previously, the Company did not record any compensation cost on the granting of stock options to employees and directors, as the exercise price was equal to or greater than the market price at the date of the grants. Options granted are accounted for using the fair value method where compensation expense is calculated using the Black-Scholes options pricing model.

**(i) Flow-through common shares**

The Company finances its exploration programs through the issuance of flow-through common shares. Income tax deductions relating to these expenditures are claimable only by the investors. Proceeds from common shares issued pursuant to flow-through financings are credited to capital stock.

**(j) Revenue recognition**

The Company earns revenues from customers of Las Vegas from Home.com Entertainment Inc. (“Las Vegas”), a related company, in accordance with an agreement which entitles the Company to 40% of revenues that are generated by Las Vegas from certain online games. The Company recognizes these revenues as they are reported and received by Las Vegas.

**(k) Income taxes**

The Company follows the liability method based on the accounting recommendations for income taxes issued by the CICA. Under the liability method, future income tax assets and liabilities are computed based on differences between the carrying amounts of assets and liabilities on the balance sheet and their corresponding tax values, using the enacted income tax rates at each balance sheet date. Future income tax assets can also result by applying unused loss carry-forwards and other deductions. The valuation of any future income tax assets is reviewed annually and adjusted, if necessary, by use of a valuation allowance to reflect the estimated realizable amount.

**4. Financial Instruments**

(a) Fair value

The fair values of cash and term deposits, amounts receivable from related parties, accounts payable and accruals, and amounts payable to related parties approximate their carrying amounts because of their short term to maturity. The fair value of marketable securities approximate quoted market values, as disclosed in note 5.

(b) Interest rate risk

The Company is not exposed to significant interest rate risk due to the short-term maturity of its monetary assets and liabilities.

(c) Credit risk

The Company is not exposed to significant credit risk with respect to its cash and cash held on behalf of related party because the funds are held in a recognized financial institution.

(d) Market risk

The Company is exposed to significant market risk with respect to marketable securities from adverse fluctuations in their market value and in the event the marketable securities are delisted from public trading.
