Mineral Properties

1. Extra High Property

On March 26, 2004, the Company entered into an Option Agreement with an arm’s length party (the “Arm’s Length Party”) in respect to certain mineral claims, which are situated in the Kamloops Mining Division in British Columbia (the “Extra High Property”). Pursuant to the terms of the Option Agreement as amended on March 8, 2005, the Company obtained the right to acquire a 100% undivided interest in the Extra High Property, subject to a 1.5% net smelter returns royalty payable to the Arm’s Length Party (the “Arm’s Length Royalty”), by making staged cash payments totalling \$150,000 and incurring exploration expenditures on the Extra High Property totalling \$500,000 over a period of three years. Upon the Company earning a 100% undivided interest in the Extra High Property, the Company obtained the right to purchase at any time 50% of the Arm’s Length Royalty by paying to the Arm’s Length Party the sum of \$500,000 leaving the Arm’s Length Party with a 0.75% NSR royalty.

Commencing in May, 2005 and up to December, 2005, the Company conducted its exploration program on the Company’s Extra High Property. The exploration program consisted of soil sampling, geological mapping, trenching and diamond drilling. A total of 1,874.3 metres of NQ diamond drilling and 455 lineal metres of trenching were completed while 194 soil samples were collected over 4 areas on the Extra High Mineral Property. The exploration work program was conducted by, and was under the direct supervision of, J.W. Murton, P. Eng, a qualified person as defined by National Instrument 43-101. Mr. J.W. Murton is a director of the Company. Mr. J. W. Murton has prepared for the Company a Technical Report (NI 43-101) on the Extra High Property (2005 Exploration Program) dated

February 28, 2006 which has been filed by the Company on www.Sedar.com , and on the Company’s Corporate Website, www.zabresources.com .

On September 8, 2006, the Company entered into an Option Agreement with Colt Resources Inc. (“Colt”) , a company related by certain common officers and directors, whereby Colt obtained the right to acquire a 50% undivided interest, subject to the Arm’s Length Royalty in the Extra High Property by incurring exploration expenditures of \$240,000 on the Extra High Property by no later than February 28, 2007 and by making cash payments to the Company totaling \$133,770 by no later than March 26, 2007.

On September 12, 2006, the Company and the Arm’s Length Party amended the Option Agreement by entering into an Amending Agreement whereby the Company was granted an extension period until June 26, 2007 to make the balance of cash payments to the Arm’s Length Party and incur the remaining exploration expenditures on the Extra High Property.

On October 31, 2006, the Company and Colt entered into an Amending Agreement whereby Colt was granted an extension period until June 26, 2007 to incur exploration expenditures on the Extra High Property and to make the cash payments to the Company.

Upon Colt earning its 50% undivided interest in the Extra High Property, the Company and Colt would thereafter equally contribute to all future exploration costs. If any party would fail to contribute its share of future exploration costs, then its respective interest would be diluted on a straight-line basis. If any party’s interest would be diluted to less than a 10% interest, then that party’s interest in the Extra High Property would be converted into a 0.5% NSR royalty.

On April 16, 2007, the Company and the Arm’s Length Party amended the Option Agreement by entering into an Amending Agreement whereby the Company was released of the requirement to incur the remaining exploration expenditures but instead was required to make a cash payment of \$60,000 (paid) to the Arm’s Length Party.

On June 14, 2007, the Company amended its Option Agreement with Colt whereby Colt would have the right to acquire a 34% interest in the Extra High Property by making cash payments to the Company totalling \$193,770 by no later than June 26, 2007. The Amending Agreement released Colt of the requirement to incur \$240,000 in exploration expenditures on the Extra High Property.

On June 26, 2007, the Company made its final payment to the Arm’s Length Party thereby earning a 100% undivided interest in the Extra High Property subject only to the Arm’s Length Royalty. Colt made its final payment to the Company and earned its 34% interest in the Extra High Property, thus reducing the Company’s interest to 66%.

At December 31, 2007, the Company held a 66% interest in the Extra High Property.

As at the year ended December 31, 2007, the actual amount spent on the Extra High Property since acquisition totals \$572,139 which consists of \$150,000 in cash payments made to the Arm’s Length Party, \$13,950 in respect to cash payments for staking, assessment and miscellaneous costs, and \$408,189 of exploration related expenditures incurred since acquisition.

As at the year ended December 31, 2007, Colt has made option payments totaling \$193,770 to the Company,

During Q4 of 2007, the Company and its joint venture partner Colt conducted a diamond drilling program on the Extra High Property. A total of 1,293.59 metres were drilled in 8 NQ diamond drill holes. The diamond drilling program was targeted at expanding the previously indicated mineralization in the K7 lens and was successful in revealing the potential for larger zones of lower grade mineralization lying adjacent to the massive sulphide mineralization indicated in earlier work. The diamond drilling program was conducted by and was under the direct supervision of J. W. Murton, P. Eng., a qualified person as defined by National Instrument 43-101. Mr. J. W. Murton is a director of both the

Company and Colt. For further particulars about the diamond drilling program please see the Company’s and Colt’s joint press release dated January 30, 2008.

On January 21, 2008, the Company entered into an Option Agreement (the “2008 Option Agreement”) with Colt whereby Colt has the right and option to acquire, in two separate equal tranches, the Company’s 66% undivided interest in the Extra High Property. Pursuant to the 2008 Option Agreement, Colt has exercised the first tranche of the option by making a cash payment of \$250,000 to the Company and has acquired from the Company a 33% undivided interest in the Extra High Property. As a result of exercising the first tranche of the option, Colt now holds a 67% undivided interest in the Extra High Property and has become the operator of the Extra High Property. Furthermore, pursuant to the 2008 Option Agreement, Colt will be solely responsible for all exploration and property expenditures in respect of the Extra High Property, which are initiated and incurred by Colt from January 31, 2008 to December 31, 2008.

In order to exercise the second tranche of the option, Colt must make a cash payment of \$250,000 to the Company on or before December 31, 2008. And upon Colt making such payment, then Colt will be deemed to have exercised the second tranche of the option and to have acquired from the Company the remaining 33% undivided interest in the Extra High Property, subject only to the Arm’s Length Royalty and to a 0.5% NSR royalty payable to the Company (the “Zab Royalty”). Colt will have the option to purchase the Zab Royalty for the sum of \$500,000 and Colt will also have the option to purchase 50% or 0.75% of the Arm’s Length Royalty for the sum of \$500,000.

In the event that Colt does not exercise the second tranche of the option by December 31, 2008, then the 2008 Option Agreement will terminate and Colt and the Company shall operate as Joint Venturers with Colt holding an initial 67% undivided interest in the Extra High Property and the Company holding an initial 33% undivided interest in the Extra High Property. Thereafter each party shall contribute its proportionate share of the property expenditures. Should a Joint Venturer fail to make its proportionate share of expenditures, its interest will be diluted. Should any party’s interest be diluted to less than a 10% undivided interest in the Extra High Property, then its interest will forever be converted to a 0.5% NSR royalty.

As at the date of this MD&A, the Company holds a 33% interest in the Extra High Property.

2. Lithium Properties

The Company holds a 100% interest in 45 mining claims in five claim groups that are located in the Nipigon area of north western Ontario and which are: the Noranda-McVittie group, the Newkirk-Vegan group, the Jean Lake Group, the Hanson Lake group and the Foster-Lew group.

Name of Claim Group	No. of Claims
Noranda-McVittie	6
Newkirk-Vegan	8
Jean Lake	25
Hanson Lake	2
Foster-Lew	4

All claims have achieved "Mining Lease Status" declaring them in good standing for 21 years commencing from May 1, 1989 with respect to the Newkirk-Vegan group, June 1, 1989 with respect to the Noranda-McVittie and the Jean Lake groups, and February 1, 1990 with respect to the Hanson Lake and the Foster-Lew groups.

At the end of fiscal year 2000, the Company wrote-off these properties.

3. Blunt Mountain Property

The original Blunt Mountain property that had been acquired in 2006 was allowed to lapse on the anniversary dates in April and May of 2007. A decision was made to re-stake a portion of the original property and was acquired for

a total cost of \$1,322. The new name for the claims and property is Mt. Blunt. The Mt. Blunt property now consists of 8 Mineral Tenures totaling 3,304 hectares located in the Omineca Mining Division of B.C.

During the summer of 2007, J.W. Murton conducted an evaluation, mapping and sampling of the Mt. Blunt property. Rock samples were collected and submitted for analysis. Results from the analytical work did not reveal sufficient metal values to make the Mt. Blunt property worthy of further work, as a result of which, J.W. Murton has recommended that the Company allow the Mt. Blunt property to lapse. As at the date of this MD&A, the claims which comprise this property have lapsed.

As at December 31, 2007, the Company has written off its investment in this property.

4. Whiteman Property

The Whiteman Property consists of 5 Mineral Tenures totaling 1,736.825 hectares located on Whiteman Creek in the Vernon Mining Division, 25 km south west from Vernon British Columbia. The size of the block is roughly 3.5 km x 4.5 km and equals 17.37 square km. Elevations range from 800m - 1600m. The center of the property is 5564000N, 314000E. The acquisition cost for the Whiteman property was \$695 and the Company spent \$4,162 in exploration related expenses for a total of \$4,857. During the year ended December 31, 2006, this amount was written off. The Company followed up with Mr. J. W. Murton’s recommendation and allowed the claims to lapse on May 12, 2007.

Fourth Quarter, (December 31, 2007)

During the three month [fourth quarter] period ended December 31, 2007, the Company had a net loss of \$(220,978) or \$(0.01) per share as compared to a net loss of \$(187,460) or \$(0.01) per share for the same three month [fourth quarter] period ended December 31, 2006.

Operating costs increased to \$376,635 as compared to \$158,982 for the same period in 2006. Items which contributed to an increase in Operating costs were Directors’ compensation, Legal, accounting and audit, Employee benefits, Mineral license fees and Office and miscellaneous.

The Company did not generate any gaming royalties during the fourth quarter in 2007 (2006: \$Nil). The Company no longer has the ability to generate gaming royalties since it sold its former investment in the three card games software in May 2006.

Risks related to our Business

The Company, and the Securities of the Company, should be considered a highly speculative investment. The following risk factors should be given special consideration when evaluating an investment in any of the Company's Securities.

From time to time the Company has acquired, for investment purposes, securities of public companies. The Company is exposed to significant market risk with respect to these securities and there are no assurances whatsoever that the Company will recover its investment in these securities.

On May 5, 2006, the Company sold its interest in the three card games software to Las Vegas, a related company, for a consideration of 6,670,000 common shares of Las Vegas. As a result of this sale, the Company will no longer be entitled to receive any gaming royalties whatsoever from the three card games software.

The Company does not generate any revenues and does not anticipate generating any revenues in the foreseeable future. Should the Company at a future date generate any revenues, then the Company intends to retain its earnings in order to finance further growth. Furthermore, the Company has not paid any dividends in the past and does not expect to pay any dividends in the future.

There are a number of outstanding securities and agreements pursuant to which common shares of the Company may be issued in the future. This will result in further dilution to the Company's shareholders.

In respect to the Company’s Mineral Exploration Properties, the exploration of mineral properties involves significant risks which even experience, knowledge and careful evaluation may not be able to avoid. The price of metals has fluctuated widely, particularly in recent years as it is affected by numerous factors which are beyond the Company’s control including international, economic and political trends, expectations of inflation, currency exchange fluctuations, interest rates, global or regional consumptive patterns, speculative activities and increased production due to new extraction methods. The effect of these factors on the price of metals, and therefore the economic viability of the Company’s mineral exploration properties cannot be accurately predicted. Furthermore, changing conditions in the financial markets, and Canadian Income Tax legislation may have a direct adverse impact on the Company’s ability to raise funds for its mineral exploration properties. A drop in the availability of equity financings will likely impede spending on mineral properties. As a result of all these significant risks, it is quite possible that the Company may lose all its investments in the Company’s mineral properties.

Financial instruments

Effective January 1, 2007, the Company adopted the Canadian Institute of Chartered Accountants’ (CICA) Handbook Section 3855, “financial instruments – recognition and measurement”, which establishes standards for recognizing and measuring financial assets, financial liabilities and non-financial derivatives. The Company classifies its debt and marketable equity securities into held-to-maturity, trading or available-for-sale categories. Debt securities are classified as held-to-maturity when the Company has the positive intent and ability to hold the securities to maturity. Debt securities for which the Company does not have the intent or ability to hold to maturity are classified as available-for-sale. Held-to-maturity securities are recorded as either short-term or long-term on the balance sheet based on contractual maturity date and are stated at amortized cost. Marketable securities that are bought and held principally for the purpose of selling them in the near term are classified as trading securities and are reported at fair value, with unrealized gains and losses recognized in earnings. Debt and marketable equity securities not classified as held-to-maturity or as trading are classified as available-for-sale and are carried at fair market value, with the unrealized gains and losses, net of tax, included in the determination of comprehensive income and reported in stockholders’ equity.

Prior to the adoption of the new standard, the Company recorded its marketable securities at the lower of cost and market value at the balance sheet date.

On the date of adoption, the Company remeasured its financial assets and liabilities as appropriate. There was no impact on the financial statements arising from the adoption of the standard. In accordance with this standard, prior period financial statements have not been restated.

(a) Financial instruments

The Company has designated its cash and cash equivalents as held-to maturity, marketable securities as available for sale, accounts receivable and notes receivable as loans and receivables, accounts payable and accrued liabilities, other liabilities and long-term debt, including current portion, as other liabilities.

The carrying values of cash, term deposits, receivables, and accounts payable and accrued liabilities approximated their fair values due to the relatively short periods to maturity of those financial instruments.

(c) Interest rate risk

The Company is not exposed to significant interest rate risk due to the short-term maturity of its monetary assets and liabilities.

(d) Concentrations of credit risk

The Company is not exposed to significant credit risk with respect to its cash and term deposits as the funds are held in a recognized financial institution.

(e) Market risk

The Company is exposed to significant market risk with respect to marketable securities due to fluctuations in their market value and the possibility of being delisted from public trading, resulting in potential losses to the Company. Currently the total amount exposed to market risk is \$983,321.

Other comprehensive income consists of unrealized gains and losses that under generally accepted accounting principles are required to be recognized in a period but excluded from net income for that period. The Company has included a comprehensive loss calculation in the statement of stockholders’ equity.
