### **Risks related to our Business**

The Company, and the Securities of the Company, should be considered a highly speculative investment. The following risk factors should be given special consideration when evaluating an investment in any of the Company's Securities.

From time to time the Company has acquired, for investment purposes, securities of public companies. The Company is exposed to significant market risk with respect to these securities and there are no assurances whatsoever that the Company will recover its investment in these securities.

On May 5, 2006, the Company sold its interest in the three card games software to Las Vegas, a related company, for a consideration of 6,670,000 common shares of Las Vegas. As a result of this sale, the Company will no longer be entitled to receive any revenues whatsoever from the three card games software.

The Company has recently ceased generating revenues on a regular basis and will not generate any revenues in the foreseeable future. Should the Company at a future date generate any revenues, then the Company intends to retain its earnings in order to finance further growth. Furthermore, the Company has not paid any dividends in the past and does not expect to pay any dividends in the future.

There are a number of outstanding securities and agreements pursuant to which common shares of the Company may be issued in the future. This will result in further dilution to the Company's shareholders.

In respect to the Company’s Mineral Exploration Properties, the exploration of mineral properties involves significant risks which even experience, knowledge and careful evaluation may not be able to avoid. The price of metals has fluctuated widely, particularly in recent years as it is affected by numerous factors which are beyond the Company’s control including international, economic and political trends, expectations of inflation, currency exchange fluctuations, interest rates, global or regional consumptive patterns, speculative activities and increased production due to new extraction methods. The effect of these factors on the price of metals, and therefore the economic viability of the Company’s mineral exploration properties cannot be accurately predicted. Furthermore, changing conditions in the financial markets, and Canadian Income Tax legislation may have a direct adverse impact on the Company’s ability to raise funds for its mineral exploration properties. A drop in the availability of equity financings will likely impede spending on mineral properties. As a result of all these significant risks, it is quite possible that the Company may lose all its investments in the Company’s mineral properties.

### **Outlook**

Management’s efforts are directed towards pursuing opportunities of merit in the mineral exploration sector for the Company.

During 2007 the Company intends to initiate a listing of the Company’s common shares on the CNQ. There are no assurances that a listing will eventually materialize. If and when the Company’s common shares are listed for trading on the CNQ, then the Company’s common shares shall be dually listed on the CNQ in Canada and on the OTC Bulletin Board in the United States at which time it is anticipated that liquidity in the trading of the Company’s common shares shall increase from its current levels, hopefully resulting in new opportunities for the Company.
