ZAB RESOURCES INC.
(An Exploration Stage Company)
Notes to the Interim Financial Statements
Three Months Ended March 31, 2008
(Canadian Dollars)

1. NATURE OF OPERATIONS

The Company was incorporated on August 24, 1984 in British Columbia. The principal business of the Company is the acquisition, exploration and, if warranted, the development of natural resource properties.

The Company had an investment in software for online gaming, which it sold during 2006. All the revenues were derived from this investment.

On March 19, 2007, the Company changed its name from Bronx Ventures Inc. ("Bronx") to Zab Resources Inc. The Company then subdivided its capital stock on a 1 (old) share for 50 (new) shares basis. As a result, the shares of Bronx were de-listed from trading and the shares of Zab Resources Inc. commenced trading on the OTC Bulletin Board in the USA under the symbol "ZABRF" on March 22, 2007.

Effective November 28, 2007, the common shares of the Company were listed for trading on the Canadian Trading and Quotation System ("CNQ") under the trading symbol "ZABK". The Cusip number of the Company's common shares is 988753109.

2. GOING-CONCERN

These financial statements have been prepared on the basis of accounting principles applicable to a "going-concern", which assumes that the Company will continue in operation for the foreseeable future and will be able to realize its assets and discharge its liabilities in the normal course of operations.

The Company is in the exploration stage and, accordingly, has not yet commenced revenue-producing operations. In addition, with the exception of the fiscal years ended 2006 and 2005, the Company has incurred significant operating losses, it sold its only source of revenue during 2006 and it has periodically had a working capital deficiency. Management's efforts are directed at pursuing opportunities of merit in the mining sector. It is the Company's intention to pursue equity and debt financings in order to conduct its operations without interruption.

These financial statements do not reflect adjustments that would be necessary if the "going-concern" assumptions were not appropriate because management believes that the actions already taken or planned will mitigate the adverse conditions.

If the "going-concern" assumptions were not appropriate for these financial statements, then adjustments would be necessary in the carrying values of assets and liabilities, the reported revenues and expenses, and the balance sheet classifications used.

3. SIGNIFICANT ACCOUNTING POLICIES

(a) Basis of presentation

These financial statements are prepared in accordance with Canadian generally accepted accounting principles and are stated in Canadian dollars.

(b) Use of estimates

The preparation of financial statements in conformity with Canadian generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements, and the reported amounts of revenues and expenses during the reporting period. Significant estimates made in the preparation of these financial statements include valuation of marketable securities, mineral properties assessments for impairment, accrued liabilities, assumptions for the determination of fair value of stock-based compensation, rates of amortization for equipment and determination of valuation allowance for future income tax assets. Management believes the estimates are reasonable; however, actual results could differ from those estimates and could impact future results of operations and cash flows.

(c) Financial instruments

Effective January 1, 2007, the Company adopted the Canadian Institute of Chartered Accountants' ("CICA") Handbook Section 3855, "financial instruments – recognition and measurement", which establishes standards for recognizing and measuring financial assets, financial liabilities and non-financial derivatives. The Company classifies its debt and marketable equity securities into held-to-maturity, trading or available-for-sale categories. Debt securities are classified as held-to-maturity when the Company has the positive intent and ability to hold the securities to maturity. Debt securities for which the Company does not have the intent or ability to hold to maturity are classified as available-for-sale. Held-to-maturity securities are recorded as either short-term or long-term on the balance sheet based on contractual maturity date and are stated at amortized cost. Marketable securities that are bought and held principally for the purpose of selling them in the near term are classified as trading securities and are reported at fair value, with unrealized gains and losses recognized in earnings. Debt and marketable equity securities not classified as held-to-maturity or as trading are classified as available-for-sale and are carried at fair market value, with the unrealized gains and losses, net of tax, included in the determination of comprehensive income and reported in stockholders' equity.

Prior to the adoption of the new standard, the Company recorded its marketable securities at the lower of cost and market value at the balance sheet date.

On the date of adoption, the Company re-measured its financial assets and liabilities as appropriate. There was no impact on the financial statements arising from the adoption of the standard. In accordance with this standard, prior period financial statements have not been restated.

3. SIGNIFICANT ACCOUNTING POLICIES (Continued)

(d) Comprehensive income

Effective January 1, 2007, the Company adopted Section 1530, "comprehensive income", which establishes standards for presentation and disclosure of comprehensive income. Comprehensive income is the overall change in the net assets of the Company for a period, other than changes attributable to transactions with stockholders. It is made up of net income and other comprehensive income. The historical make up of net income has not changed. Other comprehensive income consists of unrealized gains and losses that under generally accepted accounting principles are required to be recognized in a period but excluded from net income for that period. The Company has included a comprehensive loss calculation in the statement of stockholders' equity.

(e) Cash and cash equivalents

Cash and cash equivalents include cash and highly liquid investments that on demand are readily convertible to known amounts of cash and which are subject to an insignificant risk of change in value. Cash equivalents are held for the purpose of meeting short-term cash commitments rather than for investing or other purposes. The Company places its cash and cash equivalents with institutions of high credit worthiness.

(f) Mineral properties

The Company capitalizes all costs related to investments in mineral property interests on a property-by-property basis. Such costs include mineral property acquisition costs and exploration and development expenditures, net of any recoveries. Costs are deferred until such time as the extent of mineralization has been determined and mineral property interests are either developed, the property is sold or the Company's mineral rights are allowed to lapse.

All capitalized costs are reviewed, on a property-by-property basis, to consider whether there are any conditions that may indicate impairment. When the carrying value of a property exceeds its net recoverable amount (as estimated by quantifiable evidence of an economic geological resource or reserve or by reference to option or joint venture expenditure commitments) or when, in the Company's assessment, it will be unable to sell the property for an amount greater than the deferred costs, the property is written down for the impairment in value.

From time to time the Company may acquire or dispose of a mineral property interest pursuant to the terms of an option agreement. As such, options are exercisable entirely at the discretion of the optionee; the amounts payable or receivable are not recorded at the time of the agreement. Option payments are recorded as property costs or recoveries when the payments are made or received.

Capitalized costs are depleted over the useful lives of the properties upon commencement of commercial production or written off if the properties are abandoned or the applicable mineral rights are allowed to lapse.

(g) Amortization

Furniture and equipment are recorded at cost. The Company amortizes the costs of these assets on a declining-balance basis at the rate of 20% per annum.

3. SIGNIFICANT ACCOUNTING POLICIES (Continued)

(h) Asset retirement obligations

The Company recognizes an estimate of the liabilities associated with an asset retirement obligation ("ARO") in the financial statements at the time the liability is incurred. The estimated fair value of the ARO is recorded as a long-term liability, with a corresponding increase in the carrying amount of the related asset. The capitalized amount is depleted on a straight-line basis over the estimated life of the asset. The liability amount is increased each reporting period due to the passage of time and the amount of accretion is charged to earnings in the period. The ARO can also increase or decrease due to changes in the estimates of timing of cash flows or changes in the original estimated undiscounted cost. Actual costs incurred upon settlement of the ARO are charged against the ARO to the extent of the liability recorded. At present, the Company has no material AROs to record in the financial statements.

(i) Income taxes

The Company follows the asset and liability method based on the accounting recommendations for income taxes issued by the Canadian Institute of Chartered Accountants. Under the liability method, future income tax assets and liabilities are computed based on differences between the carrying amounts of assets and liabilities on the balance sheet and their corresponding tax values, using the enacted income tax rates at each balance sheet date. Future income tax assets can also result by applying unused loss carry-forwards and other deductions. The valuation of any future income tax assets is reviewed annually and adjusted, if necessary, by use of a valuation allowance to reflect the estimated realizable amount.

(j) Revenue recognition

Until May 2006, the Company earned revenues from customers of Las Vegas from Home.com Entertainment Inc. ("Las Vegas"), a company related by certain common officers and directors, in accordance with an agreement, which entitled the Company to 40% of revenues that were generated by Las Vegas from certain online games. The Company recognized these revenues as they were reported and received by Las Vegas.

(k) Stock-based compensation

The Company accounts for stock-based compensation using the fair value based method with respect to all stock-based payments to directors, employees and consultants, including awards that are direct awards of stock and call for settlement in cash or other assets or stock appreciation rights that call for settlement by issuance of equity instruments. Under this method, stock-based payments are recorded as an expense over the vesting period or on the grant date if they vest immediately, with a corresponding increase to contributed surplus under stockholders' equity. When stock options are exercised, the corresponding fair value is transferred from contributed surplus to capital stock.

3. SIGNIFICANT ACCOUNTING POLICIES (Continued)

(l) Earnings (loss) per share

Basic earnings (loss) per share is calculated using the weighted average number of common shares outstanding during the year. The Company uses the treasury stock method for calculating diluted earnings (loss) per share. Under this method the dilutive effect on earnings per share is recognized on the use of the proceeds that could be obtained upon exercise of options, warrants and similar instruments. It assumes that the proceeds would be used to purchase common shares at the average market price during the period.

However, diluted earnings (loss) per share is not presented where the effects of various conversions and exercise of options and warrants would be anti-dilutive. Shares held in escrow, other than where their release is subject to the passage of time, are not included in the calculation of the weighted average number of common shares outstanding.

(m) Flow-through common shares

The Company may from time to time issue flow-through common shares to finance its resource exploration activities. Canadian income tax law permits a company to renounce to the flow-through shareholder the income tax attributes of resource exploration costs financed by such shares. The tax impact to the Company of the renouncement is recorded on the date the renunciation is filed with taxation authorities, through a decrease in capital stock and the recognition of a future income tax liability.

(n) Foreign currency translation

The functional currency of the Company is the Canadian dollar. Amounts recorded in foreign currency are translated into Canadian dollars as follows:

- (i) Monetary assets and liabilities, at the rate of exchange in effect as at the balance sheet date;
- (ii) Non-monetary assets and liabilities, at the exchange rates prevailing at the time of the acquisition of the assets or assumption of the liabilities; and
- (iii) Revenues and expenses (excluding amortization, which is translated at the same rate as the related asset), at the average rate of exchange for the year.

Gains and losses arising from this translation of foreign currency are included in the determination of net income (loss) for the year.

4. FINANCIAL INSTRUMENTS

(a) Financial instruments

The Company has designated its cash and cash equivalents as held-to-maturity; marketable securities as available-for-sale; accounts receivable and notes receivable as loans and receivables; accounts payable and accrued liabilities, other liabilities and long-term debt, including current portion, as other liabilities.

(b) Fair value

Prior to the adoption of Section 3855, the Company disclosed the fair value of its financial instruments. The carrying values of cash, term deposits, receivables, and accounts payable and accrued liabilities approximated their fair values due to the relatively short periods to maturity of those financial instruments.

(c) Interest rate risk

The Company is not exposed to significant interest rate risk due to the short-term maturity of its monetary assets and liabilities.

(d) Concentrations of credit risk

The Company is not exposed to significant credit risk with respect to its cash and term deposits as the funds are held in a recognized financial institution.

(e) Market risk

The Company is exposed to significant market risk with respect to marketable securities due to fluctuations in their market value and the possibility of being delisted from public trading, resulting in potential losses to the Company. Currently the total amount exposed to market risk is \$847,681.

5. TERM DEPOSITS

The following term deposits were held by the Company as at March 31, 2008:

Interest rate	Maturity Date	Face Value
Included as reclamation deposit		
2.86%	March 24, 2009	\$ 3,000
2.20%	May 5, 2008	7,000

6. MARKETABLE SECURITIES

The Company's marketable securities comprise equity securities, all of which are classified as available-for-sale and are carried at their fair value based on the quoted market prices of the securities at March 31, 2008 and December 31, 2007. Prior to the adoption of Section 3855 (note 3(c)), the Company recorded unrealized gains and losses on marketable securities through net income.

	March 31, 2008	December 31, 2007
Marketable securities	\$ 847,681	\$ 983,321

The Company owns 7,064,006 shares (6.6%) of the total outstanding shares in the capital of Las Vegas, a publicly traded related party, as of March 31, 2008 (2007 – 7,564,006 shares or 7.4%), 6,670,000 of these shares were acquired through the sale of the three card games software. (note 9(d)).

7. MINERAL PROPERTIES

Extra High Property

On March 26, 2004, the Company entered into an Option Agreement with an arm's length party (the "Arm's Length Party") in respect to certain mineral claims, which are situated in the Kamloops Mining Division in British Columbia (the "Extra High Property"). Pursuant to the terms of the Option Agreement as amended on March 8, 2005, the Company obtained the right to acquire a 100% undivided interest in the Extra High Property, subject to a 1.5% net smelter returns royalty (the "Arm's Length Royalty"), by making staged cash payments totalling \$150,000 and incurring exploration expenditures on the Extra High Property totalling \$500,000 over a period of three years. Upon the Company earning a 100% undivided interest in the Extra High Property, the Company obtained the right to purchase at any time 50% of the Arm's Length Royalty by paying to the Arm's Length Party the sum of \$500,000 leaving the Arm's Length Party with a 0.75% NSR royalty.

On September 8, 2006, the Company entered into an Option Agreement with Colt Resources Inc. ("Colt") whereby Colt obtained the right to acquire a 50% undivided interest, subject to the Arm's Length Royalty, in the Extra High Property by incurring exploration expenditures of \$240,000 on the Extra High Property by no later than February 28, 2007 and by making cash payments to the Company totaling \$133,770 by no later than March 26, 2007.

On September 12, 2006, the Company and the Arm's Length Party amended the Option Agreement by entering into an Amending Agreement whereby the Company was granted an extension period until June 26, 2007 to make the balance of cash payments to the Arm's Length Party and incur the remaining exploration expenditures on the Extra High Property.

On October 31, 2006, the Company and Colt entered into an Amending Agreement whereby Colt was granted an extension period until June 26, 2007 to incur exploration expenditures on the Extra High Property and to make the cash payments to the Company.

7. MINERAL PROPERTIES (Continued)

Extra High Property continued

Upon Colt earning its 50% undivided interest in the Extra High Property, the Company and Colt would thereafter equally contribute to all future exploration costs. If any party would fail to contribute its share of future exploration costs, then its respective interest would be diluted on a straight-line basis. If any party's interest would be diluted to less than a 10% interest, then that party's interest in the Extra High Property would be converted into a 0.5% NSR royalty.

On April 16, 2007, the Company and the Arm's Length Party amended the Option Agreement by entering into an Amending Agreement whereby the Company was released of the requirement to incur the remaining exploration expenditures but instead was required to make a cash payment of \$60,000 (paid) to the Arm's Length Party.

On June 14, 2007, the Company amended its Option Agreement with Colt whereby Colt would have the right to acquire a 34% interest in the Extra High Property by making cash payments to the Company totalling \$193,770 by no later than June 26, 2007. The Amending Agreement released Colt of the requirement to incur \$240,000 in exploration expenditures on the Extra High Property.

On June 26, 2007, the Company made its final payment to the Arm's Length Party thereby earning a 100% undivided interest in the Extra High Property subject only to the Arm's Length Royalty. Colt made its final payment to the Company and earned its 34% interest in the Extra High Property, thus reducing the Company's interest to 66%.

At December 31, 2007, the Company held a 66% interest in the Extra High Property.

Investment in the Extra High Property consists of costs incurred as follows:

	Cumulative to March 31, 2008	Cumulative to December 31, 2007
Acquisition (property option payments)	\$ 150,000	\$ 150,000
Staking	3,639	3,639
Assessment and miscellaneous	10,311	10,311
Geological, geochemical, trenching and drilling	427,882	408,189
Colt property option payments	(443,770)	(193,770)
	\$ 148,062	\$ 378,369

On January 21, 2008, the Company entered into an Option Agreement (the "2008 Option Agreement") with Colt whereby Colt has the right and option to acquire, in two separate equal tranches, the Company's 66% undivided interest in the Extra High Property. Pursuant to the 2008 Option Agreement, Colt has exercised the first tranche of the option by making a cash payment of \$250,000 to the Company and has acquired from the Company a 33% undivided interest in the Extra High Property. As a result of exercising the first tranche of the option, Colt now holds a 67% undivided interest in the Extra High Property and has become the operator of the Extra High Property. Furthermore, pursuant to the 2008 Option Agreement, Colt will be solely responsible for all exploration and property expenditures in respect of the Extra High Property, which are initiated and incurred by Colt from January 31, 2008 to December 31, 2008.

7. MINERAL PROPERTIES (Continued)

Extra High Property continued

In order to exercise the second tranche of the option, Colt must make a cash payment of \$250,000 to the Company on or before December 31, 2008. Upon Colt making such payment, then Colt will be deemed to have exercised the second tranche of the option and to have acquired from the Company the remaining 33% undivided interest in the Extra High Property, subject only to the Arm's Length Royalty and to a 0.5% NSR royalty payable to the Company (the "Zab Royalty"). Colt will have the option to purchase the Zab Royalty for the sum of \$500,000 and Colt will also have the option to purchase 50% or 0.75% of the Arm's Length Royalty for the sum of \$500,000.

In the event that Colt does not exercise the second tranche of the option by December 31, 2008, then the 2008 Option Agreement will terminate and Colt and the Company shall operate as Joint Venturers with Colt holding an initial 67% undivided interest in the Extra High Property and the Company holding an initial 33% undivided interest in the Extra High Property. Thereafter each party shall contribute its proportionate share of the property expenditures. Should a Joint Venturer fail to make its proportionate share of expenditures, its interest will be diluted. Should any party's interest be diluted to less than a 10% undivided interest in the Extra High Property, then its interest will forever be converted to a 0.5% NSR royalty.

At March 31, 2008, the Company held a 33% interest in the Extra High Property.

Blunt Mountain Property

During 2006, the Company staked 22 mineral tenures located in the Omineca Mining Division of British Columbia (the "Blunt Mountain Property"). At the 2007 year-end, the Company decided to abandon the property and has written it off.

	2007	2006	2005	Cumulative to 2007

Geological and geochemical	9,320	2,134	0	11,454
Abandonment of property	(15,428)	0	0	(15,428)
	\$ (6,108)	\$ 6,108	\$ 0	\$ 0

Whiteman Property

During 2006, the Company staked five mineral tenures located in the Vernon Mining Division of British Columbia (the "Whiteman Property") for an acquisition cost of \$695 and spent \$4,162 in exploration related expenses for a total of \$4,857. At the 2006 year-end, this amount was written off as the Company decided to abandon the property.
