On July 21, 2014, the Company granted a General Power of Attorney to Mr. Luc Pelchat of Mexico so that he may act on behalf of the Company in respect to all legal and administrative matters in Mexico.

In April 2013, the Company entered into a purchase and sale agreement with a Mexican gaming company, whereby the Company has agreed to purchase a royalty revenue stream of an amount the greater of 10% of the net profits or 5% of the gross revenues of the Mexican land based casino for a purchase price of \$800,000. For the six months ended June 30, 2014:-

- The Company’s operating expenses were \$92,449 as compared to \$166,401 for the corresponding period in 2013. The reason for the decrease in the Company’s operating expenses during the six months ended June 30, 2014 was mainly due to the fact that the Company did not incur any consulting expenses.

- The Company recorded a net loss of \$56,703 as compared to a net loss of \$166,401 during the corresponding period in 2013. The main reason why the Company’s net loss was lower during the six months ended June 30, 2014 as compared to the corresponding period in 2013 is because the Company recorded royalty revenues of \$35,746 during the six months ended June 30, 2014 as compared to \$nil during the corresponding period in 2013, and the Company recorded \$nil for consulting fees during the six months ended June 30, 2014 as compared to \$45,436 during the corresponding period in 2013.
- The basic and diluted loss per common share was \$0.05 as compared to a basic and diluted loss of \$0.40 during the corresponding period in 2013.
- The Company’s total assets were \$852,424 as compared to \$768,555 during the corresponding period in 2013. The reason for the increase in the Company’s total assets during the six months ended June 30, 2014 was mainly due to the fact the Company was able to raise some funds by means of convertible debentures in order to make the Company’s investment in the Mexican gaming company.
- The Company had a working capital deficiency of \$287,971 as compared to a working capital of \$8,293 during the corresponding period in 2013.

The Company is presently not a party to any legal proceedings whatsoever.

Mineral Properties

1. Extra High Property

As at January 1, 2008 the Company held a 66% interest in the Extra High Property, with the remaining 34% interest being held by Colt Resources Inc. (“Colt”), a company that was formerly related by certain common directors and officers. The property is subject to a 1.5% net smelter returns royalty (“NSR”), 50% of which, or 0.75%, can be purchased at any time by paying \$500,000 to the NSR holder.

On January 21, 2008, the Company entered into an option agreement with Colt whereby Colt was granted the right and option to acquire, in two separate equal tranches, the Company’s 66% undivided interest in the Extra High Property. Pursuant to the 2008 Option Agreement, Colt exercised the first tranche of the option by making a cash payment of \$250,000 to the Company thus acquiring from the Company a 33% undivided interest in the Extra High Property. As a result of exercising the first tranche of the option, Colt increased its undivided interest in the Extra High Property to 67% and has become the operator of the Extra High Property.

In order to exercise the second tranche of the option, Colt was required to make a cash payment of \$250,000 to the Company on or before December 31, 2008. Colt did not exercise the second tranche of the option. Consequently, Colt now holds a 67% undivided interest in the Extra High Property and the Company now holds a 33% undivided interest in the Extra High Property. Pursuant to the Joint Venture which the Company and Colt have formed, each party shall henceforth contribute its proportionate share of property related expenditures. If any party fails to contribute its share of future property related expenditures, then its interest will be diluted on a

straight-line basis. If any party’s interest is diluted to less than 10%, then that party’s interest in the Extra High Property will be converted into a 0.5% net smelter returns royalty.

As at the date of this MD&A, the Company holds a 33% undivided interest in the Extra High Property.

Neither the Company nor the operator of the Extra High Property has incurred any meaningful exploration or evaluation expenditures in recent years with respect to the Extra High Property. Accordingly, during the fiscal year ended 2011, the Company has recognized an impairment provision of \$151,339 to reduce the carrying amount to \$1. If there is an indication in the future that the impairment loss recognized no longer exists or has decreased, the recoverable amount will be estimated and the carrying value of the property will be increased to its recoverable amount.

Acquisition, exploration and evaluation costs incurred in the Extra High Property are as follows:

	2014	2013	2012	Cumulative to June 30, 2014
Acquisition (property option payments)	\$ -	\$ -	\$ -	\$ 150,000
Expenditures during the year				
Staking	-	-	-	3,639
Assessment and miscellaneous	-	-	-	10,311
Geological, geochemical, trenching and drilling	-	-	-	431,160
Colt property option payments	-	-	-	(443,770)
Impairment	-	-	-	(151,339)
	\$ -	\$ -	\$ -	\$ 1

On August 1, 2014, the Company entered into a Property Option Agreement with Green Arrow Resources Inc. (“Green Arrow”), a related company by certain common directors and officers, whereby Green Arrow has been granted an irrevocable and exclusive right and option to acquire the Company’s 33% right, title and interest in the Extra High Property. In order to exercise the option and acquire the Company’s 33% right, title and interest in the Extra High Property, Green Arrow is required to make cash payments totaling \$150,000 within a period of 12 months.

2. Ontario Lithium Properties (Mineral Leases)

During the year ended December 31, 2008, the Company sold all of its Mineral Leases for gross proceeds of \$54,500. However, in the event that at a future date the Mineral Leases are placed into commercial production, then the Company is entitled to receive a 0.5% gross receipts royalty after six months from the date of commencement of commercial production.

For the six months ended June 30, 2014

- The Company had a net loss and comprehensive loss of \$15,456 or \$0.01 per share as compared to a net loss and comprehensive loss of \$124,797 or \$0.28 per share during the same three month [second quarter] ended June 30, 2013. The main reason for the Company’s lower net loss and comprehensive loss for the three months ended June 30, 2014 as compared to the corresponding period in 2013 is because during the three months ended June 30, 2014 the Company recorded royalty revenues of \$35,746 (2013: \$nil) and the Company recorded \$nil for consulting expenses (2013: \$29,168).
- The Company’s Operating costs were \$51,202 as compared to \$124,797 for the same period in 2013. Risks related to our Business

The Company, and the securities of the Company, should be considered a highly speculative investment. The following risk factors should be given special consideration when evaluating an investment in any of the Company’s securities.

The Company has recently started generating some nominal revenues however the Company does not anticipate generating any meaningful revenues in the foreseeable future. Should the Company

generate any revenues, then the Company intends to retain its earnings in order to finance growth. Furthermore, the Company has not paid any dividends in the past and does not expect to pay any dividends in the future.

There are a number of outstanding securities and agreements pursuant to which common shares of the Company may be issued in the future. This will result in further dilution to the Company's shareholders.

Governmental regulations, including those regulations governing the protection of the environment, taxes, labour standards, occupational health, waste disposal, mine safety and other matters, could have an adverse impact on the Company.

Trading in the common shares of the Company may be halted or suspended or may be subject to cease trade orders at any time and for any reason, including the failure by the Company to submit documents to the Regulatory Authorities within the required time periods.

The exploration of mineral properties involves significant risks which even experience, knowledge and careful evaluation may not be able to avoid. The prices of metals have fluctuated widely, particularly in recent years as it is affected by numerous factors which are beyond the Company's control including international, economic and political trends, expectations of inflation or deflation, currency exchange fluctuations, interest rate fluctuations, global or regional consumptive patterns, speculative activities and increased production due to new extraction methods. The effect of these factors on the price of metals, and therefore the economic viability of the Company's interests in mineral exploration properties cannot be accurately predicted. Furthermore, changing conditions in the financial markets, and Canadian Income Tax legislation may have a direct adverse impact on the Company's ability to raise funds for its interests in mineral exploration properties. A drop in the availability of equity financings will likely impede spending on mineral properties. As a result of all these significant risks, it is quite possible that the Company may lose all its investments in the Company's interests in mineral properties.

In respect to the Company's investment in the Mexican gaming company, there are no assurances whatsoever that the Company shall regularly receive casino royalty revenues from the Mexican land based casino.

Liquidity and Capital Resources

The Company has incurred operating losses over the past three fiscal years, has limited resources, and limited sources of operating cash flow.

During 2014, the Company shall require at least \$350,000 so as to conduct its operations uninterrupted. In order to meet this requirement, the Company intends to seek equity and/or debt financings through private placements and/or public offerings and/or loans. In the past, the Company has been successful in securing equity and debt financings in order to conduct its operations uninterrupted. While the Company does not give any assurances whatsoever that in the future it will continue being successful in securing equity and/or debt financings in order to conduct its operations uninterrupted, it is the Company's intention to pursue these methods for future funding of the Company.

- Level 3: Inputs for assets or liabilities that are not based on observable market data.

The Company’s convertible debentures and investments are considered level 2 and level 3, respectively, of the fair value hierarchy.

(c) Credit risk

Credit risk is the risk of financial loss to the Company if a customer or counterparty to a financial instrument fails to meet its contractual obligations.

The financial instruments that potentially subject the Company to a significant concentration of credit risk consist of cash. The Company mitigates its exposure to credit loss associated with cash by placing its cash with a major financial institution.

(d) Liquidity risk

Liquidity risk is the risk that the Company will not be able to meet its financial obligations as they are due. The Company's approach to managing liquidity is to ensure that it will have sufficient liquidity to meet its liabilities when due.

At June 30, 2014, the Company had cash of \$761 (June 30, 2013 - \$75,279) and current liabilities of \$291,194 (June 30, 2013 - \$118,761). All of the current liabilities, except for convertible debentures, are due within 90 days of June 30, 2014. Amounts due to related parties are due on demand.

(e) Market risk

Market risk is the risk that changes in market prices, such as interest rates, and foreign exchange rates will affect the Company's net earnings or the value of financial instruments. As at June 30, 2014, the Company is not exposed to significant interest rate risk, currency risk or other price risk on its financial assets and liabilities due to the short term maturity of its financial liabilities and fixed interest rate on the convertible debentures.
