Risks related to our Business

The Company, and the securities of the Company, should be considered a highly speculative investment. The following risk factors should be given special consideration when evaluating an investment in any of the Company's securities.

The Company does not anticipate to generate any revenue in the foreseeable future. In the event that the Company generates any revenues in the future, then the Company intends to retain its earnings in order to finance growth. Furthermore, the Company has not paid any dividends in the past.

There are a number of outstanding securities and agreements pursuant to which common shares of the Company may be issued in the future. This will result in further dilution to the Company's shareholders.

Governmental regulations, including those regulations governing the protection of the environment, taxes, labour standards, occupational health, waste disposal, mine safety and other matters, could have an adverse impact on the Company.

Trading in the common shares of the Company may be halted or suspended or may be subject to cease trade orders at any time and for any reason, including the failure by the Company to submit documents to the Regulatory Authorities within the required time periods.

The exploration of mineral properties involves significant risks which even experience, knowledge and careful evaluation may not be able to avoid. The prices of metals have fluctuated widely, particularly in recent years as it is affected by numerous factors which are beyond the Company's control including international, economic and political trends, expectations of inflation or deflation, currency exchange fluctuations, interest rate fluctuations, global or regional consumptive patterns, speculative activities and increased production due to new extraction methods. The effect of these factors on the price of metals, and therefore the economic viability of the Company's interests in mineral exploration properties cannot be accurately predicted. Furthermore, changing conditions in the financial markets, and Canadian Income Tax legislation may have a direct adverse impact on the Company's ability to raise funds for its interests in mineral exploration properties. A drop in the availability of equity financings will likely impede spending on mineral properties. As a result of all these significant risks, it is quite possible that the Company may lose all its investments in the Company's interests in mineral properties.

Due to the current difficult market conditions for junior companies, the Company may not be able to raise sufficient funds to meet its ongoing obligations.

In respect to the Company's investment in the Mexican gaming company, as there are no assurances whatsoever that in the foreseeable future the Company shall receive any casino royalty revenues from the Mexican land based casino, for the year ended December 31, 2014 the Company has recorded impairment of \$799,999 in regards to the Company's investment in the Mexican gaming company.
