Risks related to our Business

The Company, and the securities of the Company, should be considered a highly speculative investment. The following risk factors should be given special consideration when evaluating an investment in any of the Company’s securities.

The Company does not anticipate to generate any revenue in the foreseeable future. In the event that the Company generates any revenues in the future, then the Company intends to retain its earnings in order to finance growth.

There are a number of outstanding securities and agreements pursuant to which common shares of the Company may be issued in the future. This will result in further dilution to the Company’s shareholders.

Governmental regulations, including those regulations governing the protection of the environment, taxes, labour standards, occupational health, waste disposal, mine safety and other matters, could have an adverse impact on the Company.

Trading in the common shares of the Company may be halted or suspended or may be subject to cease trade orders at any time and for any reason, including the failure by the Company to submit documents to the Regulatory Authorities within the required time periods.

The exploration of mineral properties involves significant risks which even experience, knowledge and careful evaluation may not be able to avoid. The prices of metals have fluctuated widely, particularly in recent years as it is affected by numerous factors which are beyond the Company’s control including international, economic and political trends, expectations of inflation or deflation, currency exchange fluctuations, interest rate fluctuations, global or regional consumptive patterns, speculative activities and increased production due to new extraction methods. The effect of these factors on the price of metals, and therefore the economic viability of the Company’s interests in mineral exploration properties cannot be accurately predicted. Furthermore, changing conditions in the financial markets, and Canadian Income Tax legislation may have a direct adverse impact on the Company’s ability to raise funds for its interests in mineral exploration properties. A drop in the availability of equity financings will likely impede spending on mineral properties. As a result of all these significant risks, it is quite possible that the Company may lose its investment in the Company’s interest in the Extra High Property.

Due to the current difficult market conditions for junior mineral exploration companies, the Company may not be able to raise sufficient funds to meet its ongoing obligations.

In respect to the Company’s investment in the Mexican gaming company, there are no assurances whatsoever that in the future the Company can recover its investment.

The market price of the Company’s common shares has experienced considerable volatility and may continue to fluctuate in the future. Furthermore, there is a limited trading market for the Company’s common shares and as such, the ability of investors to sell their shares cannot be assured.

Liquidity and Capital Resources

The Company has incurred operating losses over the past three fiscal years, has limited resources, and does not have any source of operating cash flow.

During 2016, the Company shall require at least \$400,000 so as to conduct its operations uninterrupted. In order to meet this requirement, the Company intends to seek equity and/or debt financings through private placements and/or public offerings and/or loans. In the past, the Company has been successful in securing equity and debt financings in order to conduct its operations uninterrupted. While the Company does not give any assurances whatsoever that in the future it will continue being successful in securing equity and/or debt financings in order to conduct its operations uninterrupted, it is the Company’s intention to pursue these methods for future funding of the Company.

As at September 30, 2016:-

- the Company’s total assets were \$22,045 as compared to \$4,058 for the corresponding period in 2015.
- the Company’s total liabilities were \$1,043,754 as compared to \$747,249 for the corresponding period in 2015.

All securities issued in connection with this financing include a hold period in accordance with applicable securities law. A director of the Company and a family member subscribed to this non-brokered private placement.

As at September 30, 2016, a total of 1,003,333 warrants with a weighted average exercise price of \$0.14 per warrant share were outstanding.

The amount of \$222,006 has been

recorded under convertible debentures and the amount of \$27,994 has been recorded under the equity portion of convertible debenture reserve.

The Principal amount of \$250,000 together with the accrued interest of the convertible debentures became due and payable on January 6, 2016 (the “Due Date”). However, on the Due Date the Company was unable to repay the Principal amount and the accrued interest to the two directors. As of the date of this MD&A, the Company has not repaid to the two directors the Principal amount of \$250,000 together with the accrued interest.

On July 23, 2013, the Company closed the fifth tranche of the convertible debenture financing with an arm’s length party for the principal amount of \$50,000. In connection with this fifth tranche closing, as finder’s fee, the Company has made a cash payment of \$2,000 and the Company has issued 2,000 common shares at \$1.50 per share fair valued at \$3,000 and 3,333 agent warrants at an exercise price of \$1.50 per warrant until July 23, 2018 to an arm’s length party fair valued at \$5,115. (c) Credit risk

Credit risk is the risk of financial loss to the Company if a customer or counterparty to a financial instrument fails to meet its contractual obligations.

The financial instruments that potentially subject the Company to a significant concentration of credit risk consist of cash. The Company mitigates its exposure to credit loss associated with cash by placing its cash with a major financial institution.

(d) Liquidity risk

Liquidity risk is the risk that the Company will not be able to meet its financial obligations as they are due. The Company's approach to managing liquidity is to ensure that it will have sufficient liquidity to meet its liabilities when due.

At September 30, 2016, the Company had cash of \$239 (September 30, 2015 - \$1,240) available to apply against short-term business requirements and current liabilities of \$1,043,754 (September 30, 2015 - \$747,249). All of the current liabilities, except for convertible debentures, are due within 90 days. Amounts due to related parties are due on demand.

As of the date of this MD&A, convertible debentures with face value of \$350,000 have matured and are payable on demand together with accrued interest.

(e) Market risk

Market risk is the risk that changes in market prices, such as interest rates and foreign exchange rates, will affect the Company's net earnings or the value of financial instruments. As at September 30, 2016, the Company is not exposed to significant interest rate risk, currency risk or other price risk on its financial assets and liabilities due to the short term maturity of its financial liabilities and fixed interest rate on the convertible debentures.
