### **Risks related to our Business**

The Company, and the securities of the Company, should be considered a highly speculative investment. The following risk factors should be given special consideration when evaluating an investment in any of the Company's securities:

- The Company does not anticipate to generate any revenue in the foreseeable future. In the event that the Company generates any revenues in the future, then the Company intends to retain its earnings in order to finance growth.
- There are a number of outstanding securities and agreements pursuant to which common shares of the Company may be issued in the future. This will result in further dilution to the Company's shareholders.
- Governmental regulations, including those regulations governing the protection of the environment, taxes, labour standards, occupational health, waste disposal, mine safety and other matters, could have an adverse impact on the Company.
- Trading in the common shares of the Company may be halted or suspended or may be subject to cease trade orders at any time and for any reason, including, but not limited to, the failure by the Company to submit documents to the Regulatory Authorities within the required time periods.
- The exploration of mineral properties involves significant risks which even experience, knowledge and careful evaluation may not be able to avoid. The prices of metals have fluctuated widely, particularly in recent years as it is affected by numerous factors which are beyond the Company's control including international, economic and political trends, expectations of inflation or deflation, currency exchange fluctuations, interest rate fluctuations, global or regional consumptive patterns, speculative activities and increased production due to new extraction methods. The effect of these factors on the price of metals, and therefore the economic viability of the Company's interest in its mineral exploration property cannot be accurately predicted. Furthermore, changing conditions in the financial markets, and Canadian Income Tax legislation may have a direct adverse impact on the Company's ability to raise funds for its interest in the Extra High mineral exploration property. A drop in the availability of equity financings will likely impede spending on mineral properties which can affect the Company.
- The Company has outstanding debts, has working capital deficiency, has no revenues, has incurred operating losses, and has no assurances whatsoever that sufficient funding can be available for the Company to continue its operations uninterrupted.

- The market price of the Company's common shares has experienced considerable volatility and may continue to fluctuate in the future. Furthermore, there is a limited trading market for the Company's common shares and as such, the ability of investors to sell their shares cannot be assured.

### **Liquidity and Capital Resources**

The Company has incurred operating losses over the past three fiscal years, has limited resources, and does not have any source of operating cash flow.

During 2025, the Company shall require additional financing to conduct its operations uninterrupted. In order to meet this requirement, the Company intends to seek equity and/or debt financing through private placements and/or public offerings and/or loans. In the past, the Company has been successful in securing equity and debt financings in order to conduct its operations uninterrupted. While the Company does not give any assurances whatsoever that in the future it will continue being successful in securing equity and/or debt financing in order to conduct its operations uninterrupted, it is the Company's intention to pursue these methods for future funding of the Company.

As at December 31, 2024:

- the Company's total assets were \$170,656 as compared to \$121,374 for the year ended December 31, 2023 and as compared to \$55,683 for the year ended December 31, 2022.
- the Company's total liabilities were \$763,523 as compared to \$741,436 for the year ended December 31, 2023 and as compared to \$826,925 for the year ended December 31, 2022.
- the Company had \$59,922 in cash as compared to \$18,304 in cash for the year ended December 31, 2023 and as compared to \$122 in cash for the year ended December 31, 2022.
- the Company had GST receivable in the amount of \$6,232 as compared to \$4,078 for the year ended December 31, 2023 and as compared to \$1,560 for the year ended December 31, 2022.

On January 6, 2015, the Company closed convertible debentures financing with two directors of the Company for the principal amount of \$250,000. The convertible debentures have a maturity date of twelve months from the date of closing, and bear interest at the rate of 12% per annum payable on a quarterly basis. The principal amount of \$250,000 together with the accrued interest of the convertible debentures became due and payable on January 6, 2016 (the “Due Date”). However, on the Due Date the Company was unable to repay the principal amount and the accrued interest to the two directors. On October 29, 2021 the Company entered into an Addendum to the Convertible Debentures whereby the maturity date of the principal amount of \$250,000 of the convertible debentures together with the accrued interest has been extended indefinitely, until mutual consent of the Company and Lender has been reached.

The convertible debentures and accrued interest of \$549,589 (December 31, 2023 - \$519,589) are owed to the Chief Executive Officer, and to a former director of the Company.

## FINANCIAL INSTRUMENTS AND RISK MANAGEMENT

### (a) Risk management overview

The Company's activities expose it to a variety of financial risks including credit risk, liquidity risk and market risk. This note presents information about the Company's exposure to each of the above risks, the Company's objectives, policies and processes for measuring and managing risk, and the Company's management of capital. The Company employs risk management strategies and policies to ensure that any exposure to risk is in compliance with the Company's business objectives and risk tolerance levels. While the Board of Directors has the overall responsibility for the Company's risk management framework, the Company's management has the responsibility to administer and monitor these risks.

### (b) Fair value of financial instruments

The fair values of cash, accounts payable and accrued liabilities, due to related parties, loan payable and convertible debentures approximate their carrying values due to the short-term maturity of these instruments.

IFRS establishes a fair value hierarchy that reflects the significance of the inputs used in making the measurements. The fair value hierarchy has the following levels:

Level 1 – quoted prices (unadjusted) in active markets for identical assets or liabilities;

Level 2 – inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices); and

Level 3 – inputs for the asset or liability that are not based on observable market data (unobservable inputs).

(c) Credit risk

Credit risk is the risk of financial loss to the Company if a customer or counterparty to a financial instrument fails to meet its contractual obligations. The financial instruments that potentially subject the Company to a significant concentration of credit risk consist of cash. The Company mitigates its exposure to credit loss associated with cash by placing its cash with a major financial institution.

(d) Liquidity risk

Liquidity risk is the risk that the Company will not be able to meet its financial obligations as they are due. The Company's approach to managing liquidity is to ensure that it will have sufficient liquidity to meet its liabilities when due.

At December 31, 2024, the Company had cash of \$59,922 (December 31, 2023 - \$18,304) available to apply against short-term business requirements and current liabilities of \$763,523 (December 31, 2023 - \$741,436). All of the current liabilities are due within 90 days. Amounts due to related parties are due on demand. As of December 31, 2024, two convertible debentures together with the accrued interest for a total amount of \$549,589 are outstanding, and the loan payable in the amount of \$20,000 plus accrued interest in the amount of \$17,504 are due. Liquidity risk is assessed as high.

(e) Market risk

Market risk is the risk that changes in market prices, such as interest rates and foreign exchange rates, will affect the Company's net earnings or the value of financial instruments. As at December 31, 2024, the Company is not exposed to significant interest rate risk, currency risk or other price risk on its financial assets and liabilities due to the short-term maturity of its financial liabilities and the fixed interest rate on the outstanding convertible debentures.
